27G

JD3834.27

Micropinza ILM, per rimozione membrana limitante interna, **27G****27G ILM**, internal limiting membrane removal forceps

JD3839.27

Micropinza, **27G** retta, presa "coccodrillo"**27G** retinal "serrated" forceps

25G

JD3834.25

Micropinza ILM, per rimozione membrana limitante interna, **25G****25G ILM**, internal limiting membrane removal forceps

JD3839.25

Micropinza, **25G** retta, presa "coccodrillo"**25G** retinal "serrated" forceps

JD3842.25

Microforbice vitreale, **25G** retta**25G** vitreous scissors, straight jaws

23G

JD3834.23

Micropinza ILM, per rimozione membrana limitante interna, **23G****23G ILM**, internal limiting membrane removal forceps

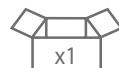

JD3839.23

Micropinza, **23G** retta, presa "coccodrillo"**23G** retinal "serrated" forceps

JD3842.23

Microforbice vitreale, **23G** retta**23G** vitreous scissors, straight jaws

## 27G RETINAL INSTRUMENTS REUSABLE

J3834.27

Micropinza ILM, per rimozione membrana limitante interna, **27G**, (mod. su base Eckardt)

**27G** ILM forceps, for removal internal limiting membrane (based on Eckardt design)

J3839.27

Micropinza, retta, presa seghettata, **27G**

**27G** retinal forceps, straight, serrated Jaws

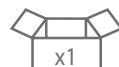

J3840.27

Microforbice vitreale, curva, **27G**

**27G** vitreous scissors, lightly curved jaws

## 25G RETINAL FORCEPS

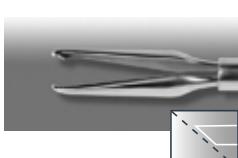

J3834.25

Micropinza ILM, per rimozione membrana limitante interna, **25G**, (mod. su base Eckardt)

**25G** ILM forceps, for removal internal limiting membrane (based on Eckardt design)

Mariotti  
J3834.1.25

Micropinza ILM, per rimozione membrana limitante interna, **25G**, presa angolata

**25G** ILM forceps, angled, grasping tips

J3838.25

Micropinza, end gripping,  
con presa delicata in punta, **25G**

**25G** retinal forceps, delicate end gripping

J3839.25

Micropinza, retta,  
presa seghettata, **25G**

**25G** retinal forceps,  
straight, serrated jaws

## 25G RETINAL FORCEPS

S.Rizzo  
J3821.25L

Pinza **ILM**, con presa tipo pinza corneale,  
1X2 denti e piano di presa, **25G**

**25G, ILM** forceps, with plug type corneal  
forceps, 1x2 teeth and gripping plane

Tano  
J3827.25

Micropinza **ILM** per membrane e  
limitante interna, **25G**

**25G, ILM** retinal forceps,  
for membranes

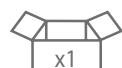

Zenoni  
J3828.25

Micropinza **ILM** per membrana limitante  
interna e epiretinica, angolata 175, **25G**

**25G ILM** retinal forceps, for epiretinal  
membranes, 175° angled, delicate jaws

## 25G RETINAL SCISSORS

J3840.25

Microforbice vitreale, curva, **25G**,  
manico in **titanio**

**25G** vitreous scissors, lightly curved jaws,  
**titanium** handle

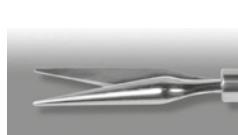

M.Romano  
J3843.25

**25G VERTICAL PICK-SCISSORS** disegnato per  
afferrare saldamente e tagliare le membrane  
aderenti alla retina che creano la trazione  
epiretinica. Utile anche per tecniche bimanuali  
quali la delaminazione e la segmentazione  
delle membrane proliferative, manico in **titanio**

**25G VERTICAL PICK-SCISSORS** designed to pick  
strongly adherent retinal tractional membranes  
and to cut the epiretinal traction at the same  
time. This instrument is also very useful in  
bimanual delimitation and segmentation of  
proliferative membrane, **titanium** handle

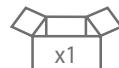

J3842.25

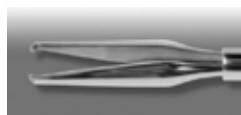

Microforbice vitreale, retta, **25G**,  
manico in **titanio**

**25G** vitreous scissors, straight jaws,  
**titanium** handle

## 23G RETINAL FORCEPS/SCISSORS "L" large handle color code reusable

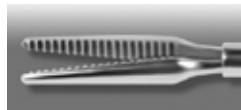

J3834.23L

Micropinza per **ILM**, **23G**, nuovo manico in **titanio**, Ø 7.5 mm (modello su base Eckardt)

**23G ILM** microforceps, new blue **titanium** handle, Ø 7.5 mm (based on Eckardt design)

J3839.23L

Micropinza **23G**, retta, presa seghettata, nuovo manico in **titanio**, Ø 7.5 mm

**23G** microforceps, straight, serrated jaws new blue **titanium** handle, Ø 7.5 mm

Rizzo  
J3833.23L

Micropinza per **ILM 23G**, con presa tipo Eckardt e piani seghettati, nuovo manico in **titanio**, Ø 7.5 mm

**23G ILM** microforceps, Eckardt style with serrated platforms, new blue **titanium** handle, Ø 7.5 mm

V. Piccirillo  
J3876.23L

Holder retinico **23G**, presa ampia ed atraumatica, utile per la chirurgia bimanuale retinica, peeling di membrane durante il trattamento **"PVR"**, retinotomia, chirurgia sottoretinica e manipolazione di patch retinocoroidali, nuovo manico in **titanio**

**23G** retinal holder with wide atraumatic holding platforms. For bi-manual retinal surgery, peeling of membranes in **"PVR"** treatment, retinotomy, subretinal, surgery and patch manipulation, new blue **titanium** handle

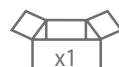

J3870.23L

Microforbice, **23G**, punte leggermente curve, taglio orizzontale, nuovo manico in **titanio**, Ø 7.5 mm, (per sistema TROCAR)

**23G** microscissors, slightly curved jaws, horizontal cut, new yellow **titanium** handle, Ø 7.5 mm (for TROCAR system)

## 23G RETINAL FORCEPS

J3834.23

Micropinza **ILM**, per rimozione membrana limitante interna, **23G**, (mod. su base Eckardt)

**23G ILM** forceps for membrane removal, (based on Eckardt design)

## 23G RETINAL FORCEPS

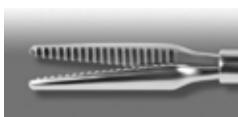

Mariotti  
J3834.1.23

Micropinza **ILM**, per rimozione membrana limitante interna, **23G**, presa angolata

**23G ILM** forceps for membrane removal, angled grasping tips

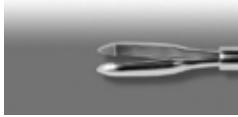

J3839.23

Micropinza, **23G**, retta, presa seghettata

**23G** retinal forceps, straight, serrated jaws

Tano  
J3827.23

Micropinza **ILM** per membrane e limitante interna, **23G**

**23G ILM** and macular forceps

Zenoni  
J3828.23

Micropinza **ILM** per membrana limitante interna ed epiretinica, angolata 175°, **23G**

**23G ILM** retinal forceps for epiretinal membranes, 175° angled, delicate jaws

## 23G RETINAL SCISSORS

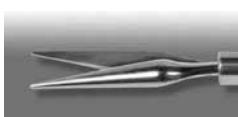

J3870.23

Microforbice, **23G**, poco curva

**23G** vitreous scissors, lightly curved jaws

J3842.23

Microforbice vitreale, **23G**, retta

**23G** vitreous scissors, straight jaws

J3843.23

Microforbice vitreale, "**taglio verticale**" **23G**, a ghigliottina, con lame 45°

**23G MPC** vitreous scissors, 45° vertical cutting action

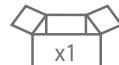

J3848.23

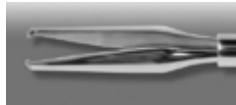

Microforbice vitreale, **23G**, lame angolate

**23G** vitreous scissors, angled jaws

## 20G RETINAL FORCEPS

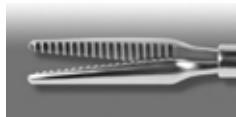

J3834

Micropinza **ILM 20G** per rimozione membrana limitante interna, manico in **titanio** (mod. su base Eckardt)

**20G ILM** forceps,  
**titanium** handle (based on Eckardt design)

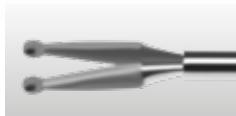

J3839

Micropinza, **20G**, retta, presa seghettata, manico in **titanio**

**20G** retinal forceps, straight, serrated jaws, **titanium** handle

J3823

Micropinza **20G** per traslocazione retinica, apici ad anello

**20G** microforceps for retinal translocation, with ring

V.Piccirillo  
J3876

holder retinico **20G** con presa ampia atraumatica, utile sia per la chirurgia bimanuale retinica (peeling di membrane durante le procedure di trattamento di "PVR", presa della retina durante procedure di retinotomia) che per la chirurgia sottoretinica (asportazione di membrana sottoretiniche, manipolazione di patch retinocoroidali), manico in **titanio**

**20G** retinal holder with wideatraumatic holding platforms. For bi-manual retinal surgery (peeling of membranes in "PVR" treatment, grasping of the retina in retinotomy) as well as for subretinal surgery (subretinal membranes removal, retinochoroidal patch manipulation), **titanium** handle

Mariotti  
J3834.1

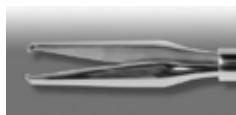

Micropinza **ILM 20G** per membrana limitante interna, con presa angolata, manico in **titanio**

**20G ILM** forceps, with angled grasping tips, **titanium** handle

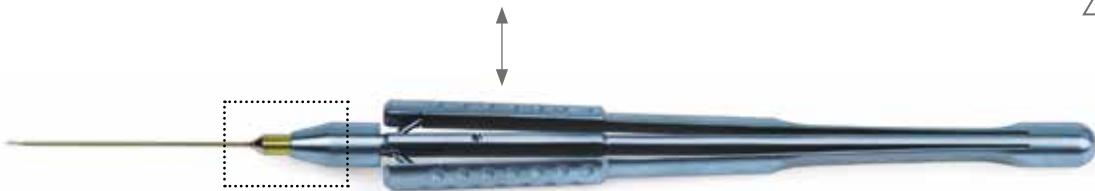

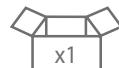

J3834.2

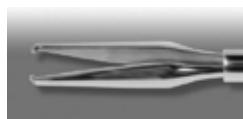

Micropinza **ILM 20G** per membrana limitante interna, **presa ultra fine** e delicata, manico **titanio**

**20G ILM** forceps, **delicate** and fine grasping tips, **titanium** handle

## 20G RETINAL FORCEPS "L" large handle color code

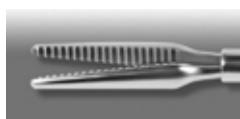

J3834L

Micropinza per **ILM 20G**, nuovo manico in **titanio**, Ø 7.5 mm (modello su base Eckardt)

**20G ILM** microforceps, new blue **titanium** handle, Ø 7.5 mm (based on Eckardt design)

J3839L

Micropinza **20G**, etta, presa seghettata, nuovo manico in **titanio**, Ø 7.5 mm

**20G** microforceps, straight, serrated jaws new blue **titanium** handle, Ø 7.5 mm

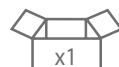

Rizzo  
J3833L

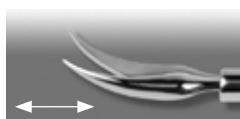

Micropinza per **ILM 20G**, con presa tipo Eckardt e piani seghettati, nuovo manico in **titanio**, Ø 7.5 mm

**20G ILM** microforceps, Eckardt style with serrated platforms, new blue **titanium** handle, Ø 7.5 mm

## 20G RETINAL SCISSORS

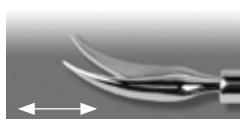

J3840

Microforbice vitreale, **20G**, curva, taglio orizzontale, manico in **titanio**

**20G** vitreous scissors, lightly curved jaws, horizontal cut, **titanium** handle

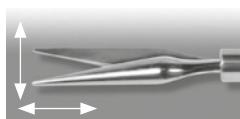

Schirru  
J3840.2

Microforbice vitreale curva, **20G**, taglio orizzontale, delicata, lame da 4 mm, manico **titanio**

**20G** vitreous scissors, curved, horizontal cut, delicate, 4 mm blades, **titanium** handle

J3842

Microforbice vitreale, **20G**, retta, manico in **titanio**

**20G** vitreous scissors, straight jaws, **titanium** handle

J3848

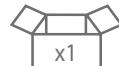

Microforbice vitreale, **20G**, con lame angolate, manico in **titanio**

**20G** vitreous scissors, angled jaws, **titanium** handle

## 20G RETINAL MPC SCISSORS VERTICAL CUT CONVENTIONAL HANDLE

taglio verticale  
vertical cutting

J3843

Microforbice vitreale, **20G**, a ghigliottina, con lame 45°, manico in **titanio**

**20G** vitreous scissors, 45° vertical cutting action, **titanium** handle

J3844

Microforbice vitreale, **20G**, a ghigliottina, con lame 90°, manico in **titanio**

**20G** vitreous scissors, 90° vertical cutting action, **titanium** handle

J3841

Microforbice vitreale, **20G**, curva, taglio verticale, manico in **titanio**

**20G** vitreous scissors, lightly curved jaws, vertical cutting action, **titanium** handle

## CORPI ESTRANEI E BIOPSIA/FOREIGN BODY AND BIOPSY

Pellegrini  
J3877

Pinza tipo punch da **25G**, per biopsia di neoformazioni retiniche e coroideali. Fornisce materiale idoneo per esami citologici e micro-istologici, manico in **titanio**

**25G** biopsy microforceps, for retinal and choroidal neoformations. It provides suitable tissue for cytologic and micro cytologic examination, **titanium** handle

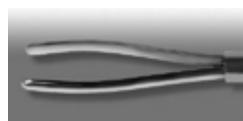

J3865

Micropinza a tre branche, **20G**, per corpi estranei endovitreali, azione inversa, manico in **titanio**

**20G** three-pronged foreign body endovitreous grasper, reverse-action, **titanium** handle

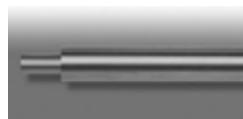

J3867

Pinza per corpi estranei, **18G**, branche da 5 mm, superficie interna trattata per presa sicura, azione diretta, manico in **titanio**

**18G** foreign body forceps with 5 mm tips, tungsten carbide coated tips for secure gripping, direct-action **titanium** handle

J3868

Micropinza magnete, stelo conico **14-18G**, per corpi estranei metallici, azione diretta, manico in **titanio**

**14-18G** magnet microforceps for foreign body, tapered shaft, direct-action, **titanium** handle

Grange  
J3875

Micropinza per biopsia nei tumori bulbari, **20G**, manico in **titanio**

**20G** biopsy microforceps for tumours, **titanium** handle

# LENTI MONOUSO/DISPOSABLE LENSES

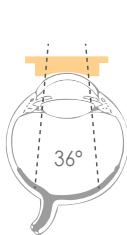

STERILE EO

5 Years  
Shelf Life

JD4811

FLAT LENS

## **lente piatta**

La lente permette una visione del polo centrale posteriore e del vitreo in occhi fachici o pseudofachici. Ideale per fotografia.  
FOV 36°, ingrandimento 1.02x

JD4805

MAGNIFYING LENS

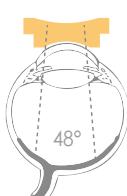

## **lente magnifying per polo posteriore convessa**

Per esaminare in modo dettagliato le membrane retiniche durante la loro manipolazione, in occhi fachici e pseudofachici.  
FOV 30°, ingrandimento 1.49x

JD4803

WIDE FIELD

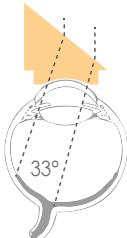

## **lente con ampio campo visivo**

La superficie concava facilita la visione del polo centrale posteriore e del vitreo in occhi fachici o pseudofachici, permettendo un campo di visione di 48°

JD4807

PRISMA 30°

## **lente prismatica - 30°**

Permette una visualizzazione del perimetro posteriore del fondo e del vitreo oltre la linea equatoriale con minima distorsione in occhi fachici, afachici e pseudofachici.  
FOV 33°, ingrandimento 1.02x

JD4802

BICONCAVE

## **lente biconcava**

Facilita la visione del fondo con l'uso di aria nella cavità vitreale, in occhi fachici e pseudofachici. FOV 25°, ingrandimento 0.80x

## **flat lens**

The lens allows the view of the central posterior pole and vitreous in phakic and pseudophakic eyes.

FOV 36°, 1.02x magnification

## **magnifying lens**

For detailed examination and minute surgical manipulation of retinal membranes in phakic and pseudophakic eyes.  
FOV 30°, 1.49x magnification

## **wide field**

Concave anterior surface facilitates a 48° field of view of the central posterior pole and central vitreus in phakic and pseudophakic eyes

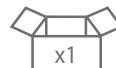

## **prisma lens - 30°**

provides visualization of the posterior peripheral fundus and vitreous beyond the equator with minimal distortion in phakic and pseudophakic eyes.  
FOV 33°, 1.02x magnification

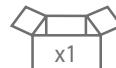

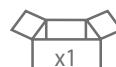

## **biconcave lens**

It facilitates the view of the fundus in an air-filled vitreous cavity in phakic and pseudophakic eyes.  
FOV 25°, 0.80x magnification

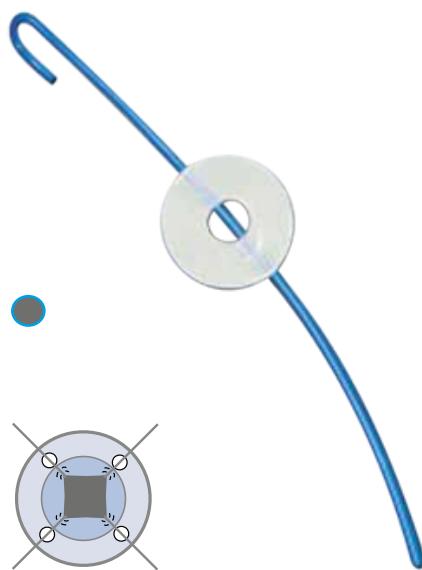

## VITRECTOMY LENSES REUSABLE

J4805		<b>lente piatta</b> La lente permette una visione del polo centrale posteriore e del vitreo in occhi fachici o pseudofachici. Ideale per fotografia. FOV 36°, ingrandimento 1,02x	<b>flat lens</b> The lens allows the view of the central posterior pole and vitreous in phakic and pseudophakic eyes. FOV 36°, 1,02x magnification	 
J4806		<b>lente prismatica - 20°</b> Permette una visualizzazione del perimetro posteriore del fondo e del vitreo oltre la linea equatoriale con minima distorsione in occhi fachici, afachici e pseudofachici	<b>prismatic lens - 20°</b> Provides visualization of the posterior peripheral fundus and vitreous beyond the equator with minimal distortion in phakic and pseudophakic eyes	
J4807		<b>lente prismatica - 30°</b> Permette una visualizzazione del perimetro posteriore del fondo e del vitreo oltre la linea equatoriale con minima distorsione in occhi fachici, afachici e pseudofachici	<b>prismatic lens - 30°</b> Provides visualization of the posterior peripheral fundus and vitreous beyond the equator with minimal distortion in phakic and pseudophakic eyes

J4805.5		<b>WideView HRI - 116D</b> Permette un campo di visione di 48 per la visualizzazione del polo centrale posteriore e del vitreo centrale in occhi fachici e pseudofachici	<b>HRI (High Refractive Index) WideView lens - 116D</b> Facilitates a 48° field of view when visualizing the central posterior pole and central vitreous in phakic and pseudophakic eyes	

## RINGS

J4801.1		<b>Ring in silicone, riutilizzabile acquistabile in lotti da 10 unità</b>	  
JD4801.1/10		<b>Ring in silicone, monouso Conf. da 10 pz. sterili</b>	   
J2092		Anello inox per lenti da vitrectomia,a due braccia	 
J3249		Pinza per lenti da vitrectomia	Lens holder

## RETRATTORI FLESSIBILI/FLEXIBLE IRIS RETRACTORS

STERILE EO

5 Years  
Shelf Life

JD4900

Retrattori flessibili,  
**1 confezione da 5 pezzi, monouso**

Flexible iris retractors,  
**1 box of 5 items, disposable**

J2294.58

Marcatore corneale per marcare i 4 punti di inserzione dei retrattori iridei. Permette un posizionamento predefinito in grado di dilatare l'iride con forma trapezoidale, con ampio spazio di manovra in zona distale

Corneal marker to mark on the cornea 4 insertion points of IRIS retractors. It allows a default positioning able to dilate the iris with trapezoidal shape, with ample room for maneuver in the distal area

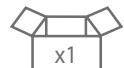

## 26G/25G/23G PICK AND SPATULAS

26G

Zenoni  
J2437.25A

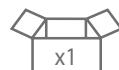

Pick per membrane fibrovascolari epiretiniche  
**26G**, apice acuto, per trocar, angolato 160°

e.janach™

**26G** membrane pick, pointed tip,  
for trocar, 160° angled

## 26G/25G/23G PICK AND SPATULAS

**25G**

M.Romano  
J2424.25A

PICK RAKE-SCRAPER **25G** per separare le membrane dalla superficie retinica. Le tre punte smusse, consentono, attraverso un "massaggio retinico", di individuare il giusto piano di clivaggio tra la membrana proliferativa e la retina

J2423.25A

Spatola smussa per peeling e stripping membrane epiretiniche **25G**, per trocar

**25G** BLUNT RETINAL RAKE-SCRAPER is designed to smoothly separate the tractional membranes from the retinal surface. The three blunt tips allow the surgeon to find, throughout a "retinal massage", the right cleavage plane between the retina and the proliferative membrane

**25G** blunt spatula for peeling and stripping retinal membranes, for trocar

**23G**

J2430.23A

Pick per membrane **23G**, angolato 90°, lunghezza 0.4 mm, smusso, mod. Weiss

e.janach™

**23G** membranes pick, 90° angled, 0.4 mm long, blunt, design: Weiss

Zenoni  
J2437.23A

Pick per membrane fibrovascolari epiretiniche **23G** apice acuto, per trocar, angolato 160°

**23G** membrane pick, pointed tip, for trocar, 160° angled

J2423.23A

Spatola smussa per peeling e stripping membrane epiretiniche **23G**, per trocar

**23G** blunt spatula for peeling and stripping retinal membranes, for trocar

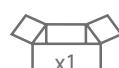

J2428.23A

Spatola per peeling membrane epiretiniche **23G**, angolata 160°, bordi taglienti

**23G** spatula for peeling epiretinal membranes, angled 160°, sharp edges

## RETINAL SPATULA FOR ANTERIOR SEGMENT

J2408A

Spatola da vitreo con dischetto distale

Vitreous spatula with small disc-shaped tip

J2409.1A

dischetto distale **destro**

half-disc shaped tip on **right side**

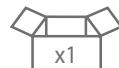

J2409.2A

dischetto distale **sinistro**

half-disc shaped tip on **left side**

## 20G PICK AND SPATULAS

titanium handle

J2430.1A

Pick per membrane, **20G**, angolato 90°, lunghezza 0.20 mm, smusso, mod. Weiss

**20G** membrane pick, 90° angled, 0.20 mm long, blunt, design: Weiss

J2430.2A

Pick per membrane, **20G**, angolato 90°, lunghezza 0.40 mm, smusso, mod. Weiss

**20G** membrane pick, 90° angled, 0.40 mm long, blunt, design: Weiss

J2430.11A

Pick per membrane, **20G**, angolato 120°, lunghezza 0.20 mm, smusso, mod. Weiss

**20G** membrane pick, 120° angled, 0.20 mm long, blunt, design: Weiss

J2430.12A

Pick per membrane, **20G**, angolato 120°, lunghezza 0.40 mm, smusso, mod. Weiss

**20G** membrane pick, 120° angled, 0.40 mm long, blunt, design: Weiss

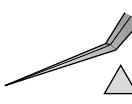

DeMolfetta-Zenoni  
J2437.1A

Pick per membrane fibrovascolari epiretiniche, **20G**, angolato, apice acuto, bordi smussi

**20G** membrane pick, angled, sharp tip

J2437.7A

Pick per incisione retinica, **20G**, sezione triangolare △, angolato 135°, apice 0.25 mm, braccio da 5 mm

**20G** pick for retinal incisions, triangular-shaped section △, angled 135°, 0.25 tip size, 5 mm angle to tip

J2423A

Spatola smussa per peeling e stripping membrane epiretiniche, **20G**

**20G** blunt spatula for peeling and stripping retinal membranes

J2424A

Spatola a rastrello per pulizia residui, **20G**, denti smussi

**20G** membrane rake, blunt teeth

J2426A

Spatola per manipolazione e massaggio della retina, **20G**, punta da 2.5 mm, buttonata

**20G** spatula knob for retinal massage and manipulation, 2.5 mm long, blunt, bulbous tip

J2428A

Spatola per peeling e manipolazione membrane epiretiniche, **20G**, corta, punta smussa

**20G** spatula for peeling and manipulation of membranes, short, blunt tip

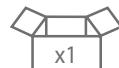

J2429A

Pick manipolazione membrane epiretiniche, **20G**, punta smussa da 0.3 mm

**20G** membrane manipulator pick, 0.3 mm, blunt tip

## BACKFLUSH HANDLES AND NEEDLES

J3780

Backflush per aspirazione passiva,  
in **titanio blu**

Passive aspirating backflush,  
**blue titanium** handle

J3780.1

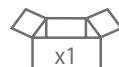

Backflush per aspirazione passiva,  
in **titanio viola**  
(per migliore riconoscibilità con punte diverse)

Passive aspirating backflush,  
**violet titanium** handle  
(for better identification using different tips)

J3784

Serbatoio di ricambio J3780 e J3780.1  
**Disponibile solo in lotti da 6 pz.**

Silicone reservoir, for J3780 and J3780.1  
**Available only in lots of 6 pcs.**

J3770

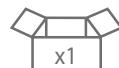

Backflush per aspirazione attiva,  
in **titanio**

Active aspirating backflush,  
**titanium** handle

J3774

Serbatoio di ricambio per J3770  
**Disponibile solo in lotti da 6 pz.**

Silicone reservoir, for J3770  
**Available only in lots of 6 pcs.**

## SERBATOIO/RESERVOIR

STERILE EO

5 Years  
Shelf Life

JD3784

Serbatoio di ricambio J3780 e J3780.1  
**conf. da 10 pz. sterili, monouso**

Silicone reservoir, for J 3780 and J3780.1  
**10 sterile pieces/box, disposable**

## BACKFLUSH HANDLES AND NEEDLES

STERILE EO

5 Years  
Shelf Life

JD95641

Backflush attivo/passivo,  
cannula 23G a punta morbida

Active/passive backflush handle with **23G**  
**soft tip** cannula

JD95615

Backflush attivo/passivo,  
cannula 25G a punta morbida

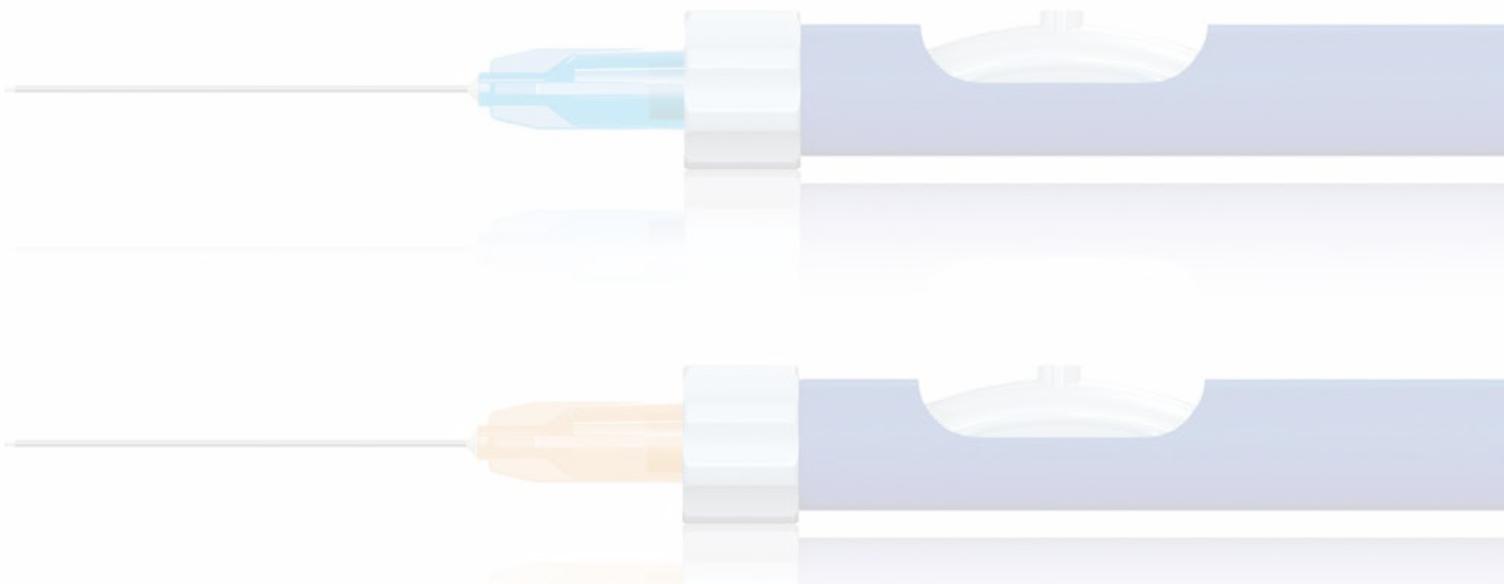

Active/passive backflush handle with **25G**  
**soft tip** cannula

JD95590A

Backflush attivo/passivo

Active/passive backflush handle.  
Allows conversion from active to passive aspiration

# BACKFLUSH CANNULE/NEEDLES

## BLUNT TIP

STERILE EO

5 Years  
Shelf Life

**JD95582**

cannula 20G x 32 mm, per **BACKFLUSH**  
**(non protetta)**

cannula 20G x 32 mm, for **BACKFLUSH**

**JD95589**

23G x 32 mm

23G x 32 mm

**JD95588**

25G x 32 mm

25G x 32 mm

**JD95597**

27G x 32 mm

27G x 32 mm

## SOFT TIP

**JD95568**

cannula 20G x 32 mm, **SOFT TIP**  
lunghezza silicone 1 mm

cannula 20G x 32 mm,  
silicon length 1mm, **SOFT TIP**

**JD95569**

23G, lunghezza silicone 2 mm

23G x 32 mm,  
silicon length 2 mm, **SOFT TIP**

**JD95567**

25G, lunghezza silicone 1 mm

25G x 32 mm,  
silicon length 1 mm, **SOFT TIP**

## BRUSH TIP

**JD95586**

cannula 20G x 32 mm, **BRUSH SILICONE**,  
lunghezza silicone 1.25

20G x 32 mm, **BRUSH SILICONE** cannula,  
silicon length 1.25 mm

J4428

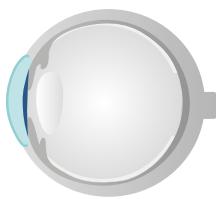

## NPB MACULAR BUCKLE

Il buckle NPB è un dispositivo medico realizzato per il trattamento del distacco e della schisi maculare, tramite la sua azione di spinta della sclera verso la retina. È realizzato in PMMA e rivestito con silicone di grado medico, che ne aumenta la biocompatibilità. Ha una forma geometrica a J ed è composto da una testa indentante emisferica con base piatta, e da un braccio che permette il fissaggio del dispositivo alla sclera anteriore. Il braccio, largo come la testa, ha una lunghezza variabile a seconda della lunghezza assiale dell'occhio e, nella parte

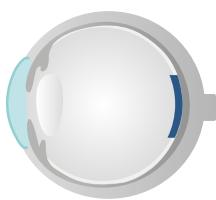

terminale anteriore, presenta 4 fori per il posizionamento delle suture sclerali. Intorno al braccio può essere inserita una fascetta in silicone che facilita l'alloggiamento di una sonda luminosa. Attraverso l'effetto della transilluminazione, consente al chirurgo di posizionare correttamente la testa in corrispondenza della macula. La sonda luminosa può essere sfilata a fine intervento senza togliere la fascetta in silicone. Il buckle NPB può essere comunque fissato anche senza la sonda luminosa

## COLORANTI PER SEGMENTO ANTERIORE/POSTERIORE

### AJL-BLUE 0.06% ophthalmic solution

è una soluzione oftalmica sterile di trypan blue, intraoculare e biocompatibile utilizzata nella chirurgia oftalmica del **segmento anteriore**. Questo colorante oftalmico viene utilizzato come coadiuvante nelle capsuloressi e minimizza il rischio di lacerazione negli occhi con cataratta matura, o con piccole pupille

### AJL-BBG 0.25% ophthalmic solution

è una soluzione oftalmica sterile, apirogena, isotonica, pronta per l'uso in chirurgia vitreoretinica nel **segmento posteriore**. La soluzione BBG è in grado di colorare efficacemente la membrana limitante interna (ILM)

## CANABRAVA RING

Anello di espansione dell'iride, progettato per espandere in sicurezza l'iride al fine di semplificare la facoemulsificazione, nonché negli interventi chirurgici in cui la pupilla non si dilata correttamente attraverso l'uso di farmaci. Fornisce un'apertura pupillare di 6,3 mm e mantiene stabile la dilatazione durante l'intervento chirurgico, migliorando l'accesso e il campo visivo del chirurgo.

### DESCRIZIONE:

- Anello semicircolare 300° con apertura 60° ricavato da un unico pezzo
- Non richiede un iniettore
- Facile da inserire e rimuovere
- L'anello può essere inserito in incisioni < a 2 mm
- Facile da inserire in pupille < a 4,5 mm e in camere poco profonde
- Visibilità ottimale
- Dispositivo monouso, non può essere risterilizzato
